Neural network software

Alyuda **neural network software** is among the most **powerful, feature-packed and easy-to-use** neural network tools for data mining, forecasting and pattern recognition. Many proven algorithms and data preprocessing techniques are combined with unique visualization and architecture search features to help you get the best results in **data mining, forecasting and pattern recognition**.

Featured Products

Alyuda NeuroIntelligence

Neural network software for data mining and AI experts. Use the best to date ANN algorithms and techniques coupled with automatic data preprocessing. **Create, train, test and query neural networks** much faster with extensive processes visualization and unique time-saving features.

Trading software

Alyuda offers **stand-alone trading software for professional end-of-day traders** based on proven technical analysis techniques and state-of-the-art AI algorithms. For active traders Alyuda offers **stock market prediction and strategy testing Excel add-in** based on neural networks and technical analysis.

Alyuda NeuroSignal XL

Stock trading software based on neural nets. Designed as an Excel add-in, the tool combines the **prediction power of neural networks** technology with proven capabilities of technical indicators and the data manipulation strength of Excel. **Builds and tests stock market trading systems.**

Forecasting software

Based on neural networks, Alyuda forecasters produce **reliable forecasts even if input data have noise**, non-linear dependencies and incompleteness. Alyuda **forecasting software** makes it **easy to start with neural nets** because it automatically designs, trains and tests networks using the latest advances in artificial intelligence.
